

What are COFAMIs?

The research covers a range of initiatives that share the following characteristics:

- › focus on collective action
- › active farmers' involvement
- › marketing orientation and
- › innovativeness in product characteristics, strategy or organisational form.

Examples of COFAMIs include:

- › the pooling of products and resources for joint marketing,
- › farmers' groups that collectively produce local specialty or organic products,
- › the collective promotion of regional foods,
- › joint investment in bioenergy production,
- › the collective supply of services (tourism, care, etc.) or even public goods (landscape, water management).

Project partners

- › Rural Sociology Group, Wageningen University, The Netherlands, henk.renting@wur.nl (co-ordinator)
- › Research Institute for Organic Agriculture (FiBL), Switzerland, juern.sanders@fibl.ch
- › QAP Decision, France, Gerald.assouline@upmf-grenoble.fr
- › Institute for Rural Development Research (IfLS), Germany, knickel@em.uni-frankfurt.de
- › Centre for Mountain Agriculture, Innsbruck University, Austria, markus.schermer@uibk.ac.at
- › Baltic Studies Centre, Latvia, tt@lza.lv
- › Research Centre on Animal Production (CRPA Spa), Italy, k.de.roest@crpa.it
- › Danish Institute of Agricultural Sciences, Denmark, egon.noe@agrsci.dk
- › Institute for Political Sciences, Hungarian Academy of Sciences, Hungary ikovach@mtapti.hu
- › Faculty of Economics and Management, Czech University of Agriculture in Prague, Czech Republic, lostak@pef.czu.cz

The COFAMI project is made possible by financial support of the European Commission.

Encouraging Collective Farmers Marketing Initiatives

Background and objectives

Collective action by farmers has played an important role in the history of European agriculture and rural development. During the 20th century the joint actions of farmers in many EU countries gave rise to the foundation of agricultural marketing co-operatives, resulting in better market access, increased farm incomes and regional employment. More recently farmer collectives have made an important contribution to the spread of sustainable production methods.

Now European agriculture is facing a range of new challenges. Farmers have gradually lost control over supply chains, due to the growing power of retailers, and are also confronted with a general decline and reorientation of policy support. At the same time, there is a need to respond to changing consumer demands for food safety, quality and an attractive countryside. Again, collective action may help in finding appropriate answers for these new challenges.

Against this background the COFAMI project studies the potential role of collective farmers' marketing initiatives (COFAMIs) in finding adequate responses to changing market and policy conditions. More specifically it aims to identify the social, economic, cultural and political factors that limit or enable the development of such initiatives. The project also seeks to identify viable strategies and support measures to enhance the performance of collective farmers' marketing initiatives.

Steps in the research

- › At the start of the research a **conceptual framework** for the study of COFAMIs will be developed. A review of relevant scientific literature and a 'quick-scan' of eight previous EU research projects which included COFAMI cases will provide the basis for this.
- › For each study country a **status-quo analysis** of collective marketing initiatives and relevant contextual factors will be made. This involves an overview of existing COFAMIs, their aims, organisational forms and strategies, relations with other supply chain partners, and relevant market and policy environments.
- › A series of 18 in-depth **case studies** of different types of COFAMIs will be conducted. These will provide more detailed insights into the influence of different factors that limit and enable the development, performance and continuity of COFAMIs. The performance of initiatives in terms of social, economic and environmental impacts will also be assessed.
- › In the **synthesis** the results of these different research activities will be integrated into general conclusions about the relative importance of various limiting and enabling factors for different types of COFAMIs. Support strategies for COFAMIs and measures to improve their performance and dissemination will also be formulated.

Project results and consultation

Participatory methods and stakeholder consultation will play a key role in all stages of the project, to ensure that research outcomes are grounded in field experiences and policy debates. A National Stakeholder Forum will be established in each participating country. In addition a European-level expert group of scientific and field experts will be formed to broaden geographical coverage beyond the 10 countries represented in the project.

The research will provide farmer groups, support organisations and government agencies with insights into different collective marketing strategies, their success and failure factors, and suggestions of measures that support COFAMIs.

Additionally, the project will contribute to scientific and policy debates on the role of farmers' initiatives and new supply chain arrangements in promoting sustainable rural development and the supply of safe and quality food.

All project results will be made available through the project website www.cofami.org
